VENUE

Taipei (literally means "North of Taiwan") is the capital and the largest city of Taiwan, with a population of more than 2.6 million. It is situated in a basin in northern Taiwan that was inhabited by aboriginal peoples until the settlers from southeastern China immigrated to the area about 300 years ago. Taipei is the political, economic, educational, and cultural center of Taiwan, and one of the major hubs of the Chinese-speaking world. Considered to be a global city, Taipei is part of a major high-tech industrial area. Railways, high-speed rail, highways, airports, and bus lines connect Taipei with all parts of the island. With its rich cultural offerings, Taipei is also home to various world-famous architectural or cultural landmarks. For a glimpse of where the rest of Taiwan is heading, take a close look at Taipei today.

The conference of PPS-34 will take place at the Taipei International Conventional Center (TICC) located at the most prosperous area of Taipei City next to the Taipei 101 tower (the second tallest building in the world).

ABOUT PPS

The Polymer Processing Society was founded in March 1985 at the University of Akron, Akron, Ohio, USA. The intent was to provide a mechanism and format for interaction and presentation of research results in the international polymer processing community. The goals of the Polymer Processing Society (PPS) as embodied in its constitution are to foster scientific understanding and technical innovation in polymer processing by providing a discussion forum for the worldwide community of engineers and scientists in the field. The thematic range of the PPS encompasses all formulation, conversion and shaping operations applied to polymeric systems in the transformation from their monomeric forms to commercial products.
